2020-06-03 clipgrab - pengunduh yang mudah digunakan untuk youtube dan situs lainnya

clipgrab.org

clipgrab adalah sebuah aplikasi pengunduh dan pengubah untuk youtube, vimeo, facebook dan situs video lainnya lagi. clipgrab dapat mengubah video yang diunduh ke format mpeg4/mp4, mp3 atau format lainnya dengan satu langkah yang mudah.

clipgrab untuk windows – mengunduh video youtube di windows tidak bisa lebih mudah dari ini! clipgrab bekerja dengan baik di windows 10, windows 8 dan windows 7.

clipgrab untuk mac – clipgrab menyajikan pengalaman terbaik mengunduh video untuk mac kamu. untuk macos, terdapat dua versi yang tersedia: versi bawaan membutuhkan setidaknya macos 10.12 (sierra). versi jadul menyediakan dukungan untuk sistem yang lebih lawas dan 32-bit atau prosesor ppc.

clipgrab untuk linux – clipgrab merupakan proyek open-source yang dilisensikan dibawah lisensi gplv3 dan tentu saja tersedia juga untuk linux (appimage). kamu dapat mengunduh versi yang sudah dikompilasi yang telah diuji diversi ubuntu terbaru. alternatifnya, ambil kode sumber dan kompilasikan sendiri clipgrab kamu.

2021-03-07 kapan waktu terbaik untuk makan ketika ingin berolahraga dan setelah olahraga

sumber : [eatright.org](#) dan [livestrong.com](#)

umumnya, tidak baik berolahraga ketika baru saja selesai makan. idealnya, kamu harus mengisi perut kamu 1 sampai 4 jam sebelum berolahraga, setiap orang berbeda-beda, coba praktekkan dan cari waktu yang terbaik untuk tubuh kamu. waktu makan terbaik setelah olahraga sekitar 15 menit hingga 2 jam, tergantung seberapa berat kamu latihan, semakin berat latihan, makan tubuh kamu lebih perlu cepat diisi. makanan disini, baik sebelum dan sesudah berolahraga pastikan mengandung kalori dan protein.

2021-03-23 f5bot - dapatkan sebuah surel ketika kamu disebut secara online!

f5bot adalah sebuah layanan gratis yang akan mengirim surel ke kamu ketika kata kunci yang kamu pilih disebut di [reddit](#), [hacker news](#), atau [lobsters](#). gunakan f5bot untuk memonitor merek, proyek kamu, atau topik yang kamu pikir menarik.

f5bot sangat simpel:

[daftarkan diri untuk mendapatkan sebuah akun](#)

masukan sebuah daftar kata kunci

f5bot akan mengirim sebuah surel ke kamu ketika satu dari kata kunci yang sudah kamu pilih disebut di reddit, hacker news, atau lobsters

layanan ini sepenuhnya gratis. tidak ada batasan penggunaan.

punya pertanyaan? lihat [soal sering ditanya](#).

siap untuk mencobanya? [daftar sekarang!](#)

2021-04-18 bagaimana caranya menghapus berkas file komputer yang duplikat dengan mudah dan cepat?

czkawka adalah sebuah aplikasi yang simpel, cepat, dan mudah digunakan untuk menghapus berkas yang tidak dibutuhkan dari komputer kamu.

fitur:

ditulis dimemory safe rust

sangat cepat – karena menggunakan algoritma tingkat lanjut dan multithreading
sumber terbuka dan merdeka tanpa iklan

lintas-platform – berjalan di linux, windows dan macos

mendukung tembolok – pemindaian kedua dan seterusnya akan lebih cepat dari yang pertama
antarmuka cli – untuk otomatisasi yang mudah

antarmuka gui – menggunakan gtk 3 yang modern dan mirip dengan fslint

opsi pencarian yang banyak – mengizinkan pengaturan folder yang harus dimasukkan dan
pengecualian, mengatur ekstensi berkas atau mengecualikan item dengan * wildcard

alat yang multifungsi dan dapat digunakan untuk:

duplicat – mencari file yang sama berdasarkan nama berkas, ukuran, hash, hash 1 mb awal
folder kosong – mencari folder kosong dengan bantuan algoritma tingkat lanjut

berkas besar – mencari berkas dengan ukuran besar difolder tertentu

berkas kosong – mencari file kosong yang ada diseluruh komputer

berkas sementara – menemukan file sementara (temporary)

gambar yang sama atau mirip – menemukan gambar yang tidak persis sama atau mirip (resolusi
yang berbeda, watermark)

berkas nol – menemukan berkas yang diciptakan oleh program (biasanya yang sudah korup)

musik lagu yang sama – mencari musik dengan artis, album, dan semisalnya yang sama

tautan simbolik tidak valid – memerlukan tautan simbolik yang mengarah ke berkas/folder yang
sebenarnya tidak ada

berkas yang rusak – menemukan berkas dengan ekstensi tidak valid atau yang sudah korup

2024-09-14 tailscale.com/kb/1223/funnel

tailscale-funnel-diagram.png

“Tailscale Funnel lets you route traffic from the broader internet to a local service running on a device in your Tailscale network (known as a tailnet). You can use it to share a local service, like a web app, for anyone to access—even if they don’t use Tailscale.”

hmm, mirip2 kaya ngrok dan cloudflare tunnel

2024-09-14 beacondb.net

Screenshot beaconDB map.png

“beaconDB aims to be an alternative to Mozilla Location Services that offers public domain dumps of its WiFi database.

When [Mozilla Location Services shut down](#), it wasn't able to publish the massive amount of access points its users had collected due to legal and privacy concerns. beaconDB obfuscates the data it releases so that it is not possible to reasonably estimate the location of a single device.

buat yang mau ikut kontribusi data lokasi (wifi, bluetooth, gps), alternatif dari [Mozilla Location Service](#).

2024-09-15 [www.stirlingpdf.com](#)

stirlingpdf-home-dashboard-app-screenshot.jpg

“This is a robust, locally hosted web-based PDF manipulation tool using Docker. It enables you to carry out various operations on PDF files, including splitting, merging, converting, reorganizing, adding images, rotating, compressing, and more. This locally hosted web application has evolved to encompass a comprehensive set of features, addressing all your PDF requirements.

Stirling PDF does not initiate any outbound calls for record-keeping or tracking purposes.

All files and PDFs exist either exclusively on the client side, reside in server memory only during task execution, or temporarily reside in a file solely for the execution of the task. Any file downloaded by the user will have been deleted from the server by that point.”

buat yang suka berputat dengan file pdf recommended banget pake ini, paling lengkap yg saya tau, bisa buat di windows maupun linux (pake docker)

2024-09-17 Cyotek WebCopy : Copy websites locally for offline browsing

Cyotek Webcopy Application Screenshot.png

“Cyotek WebCopy is a tool designed to create local copies of websites for offline viewing.

WebCopy will automatically crawl a website and download its content, remapping links to other files to allow offline browsing. WebCopy can authenticate with websites, post forms, and allows the use of rules to download only the content you wish. Many advanced configuration options are available, including proxy servers, sub domain support, crawling linked servers (for example a CDN), advanced control over HTTP options, and much more.”

pengen nyoba di Windows, penasaran

2024-09-21 Grow Your Own Services : Are you fed up with Facebook, Google and Microsoft?

Grow Your Own Services.jpg

“Grow Your Own Services aims to encourage people and organisations to create their own internet services by highlighting managed hosting options.

Managed hosting is by far the easiest way to make your own internet services, but it isn't very well advertised. Hopefully more people will realise they don't need to be techno-nerds to build their own internet presence.

This site encourages traditional sustainable decentralisation, as used by telephones, email and the world wide web. There are lots of good reasons why this is the best way of doing things.”

mirip2 dengan indieweb , menarik buat dibaca2

2025-01-12_10-10-55 <https://follow.is/> - Follow your favorites in one inbox

“As they say, your thoughts are what you read—and we've been consuming noisy feeds for too long! Follow organizes content into one timeline, keeping you updated on what matters, noise-free. Share lists, explore collections, and enjoy distraction-free browsing.

2025-01-17_20-54-34 <https://docs.rsshub.app/deploy/config#access-control-configurations>

Access Key/Code

- ACCESS_KEY: the access key. When set, access via the key directly or the access code described above

Access code is the md5 generated based on the access key + route, eg:

Access key	Route	Generating access code	Access code
ILoveRSSHub	/qdaily/column/59	md5('/qdaily/column/59' + 'ILoveRSSHub')	0f820530128805ffc10351f2 2b5fd121

- Routes are accessible via code, eg:
<https://rsshub.app/qdaily/column/59?code=0f820530128805ffc10351f22b5fd121>
- Or using key directly, eg: <https://rsshub.app/qdaily/column/59?key=ILoveRSSHub>

Healthcheck Configuration

When ACCESS_KEY is enabled, the healthcheck endpoint also requires authentication.

For a Docker Compose deployment, you'll need to update the healthcheck configuration in your docker-compose.yml to include the access key or access code parameter.

The recommended configuration is:

```
healthcheck:  
- test: ["CMD", "curl", "-f", "http://localhost:1200/healthz"]  
+ test: ["CMD", "curl", "-f", "http://localhost:1200/healthz?key=${ACCESS_KEY}"]
```
