2024-12-22 aplikasi keepassxc tidak bisa dibuka sama sekali di windows 11

tiba-tiba aplikasi keepassxc ga kebuka walau udah klik open berkali-kali, hanya loading aja, udah coba pilih menu repair di file installernya, tapi tetep ga responsif ga ada perubahan, setelah cari di internet ([reddit](#), [github](#), dan [keepassxc](#)) diarahkan untuk instal (atau instal ulang) [MSVC Redistributable](#) dan akhirnya bisa langsung kebuka lagi secara normal aplikasi keepassxcnya

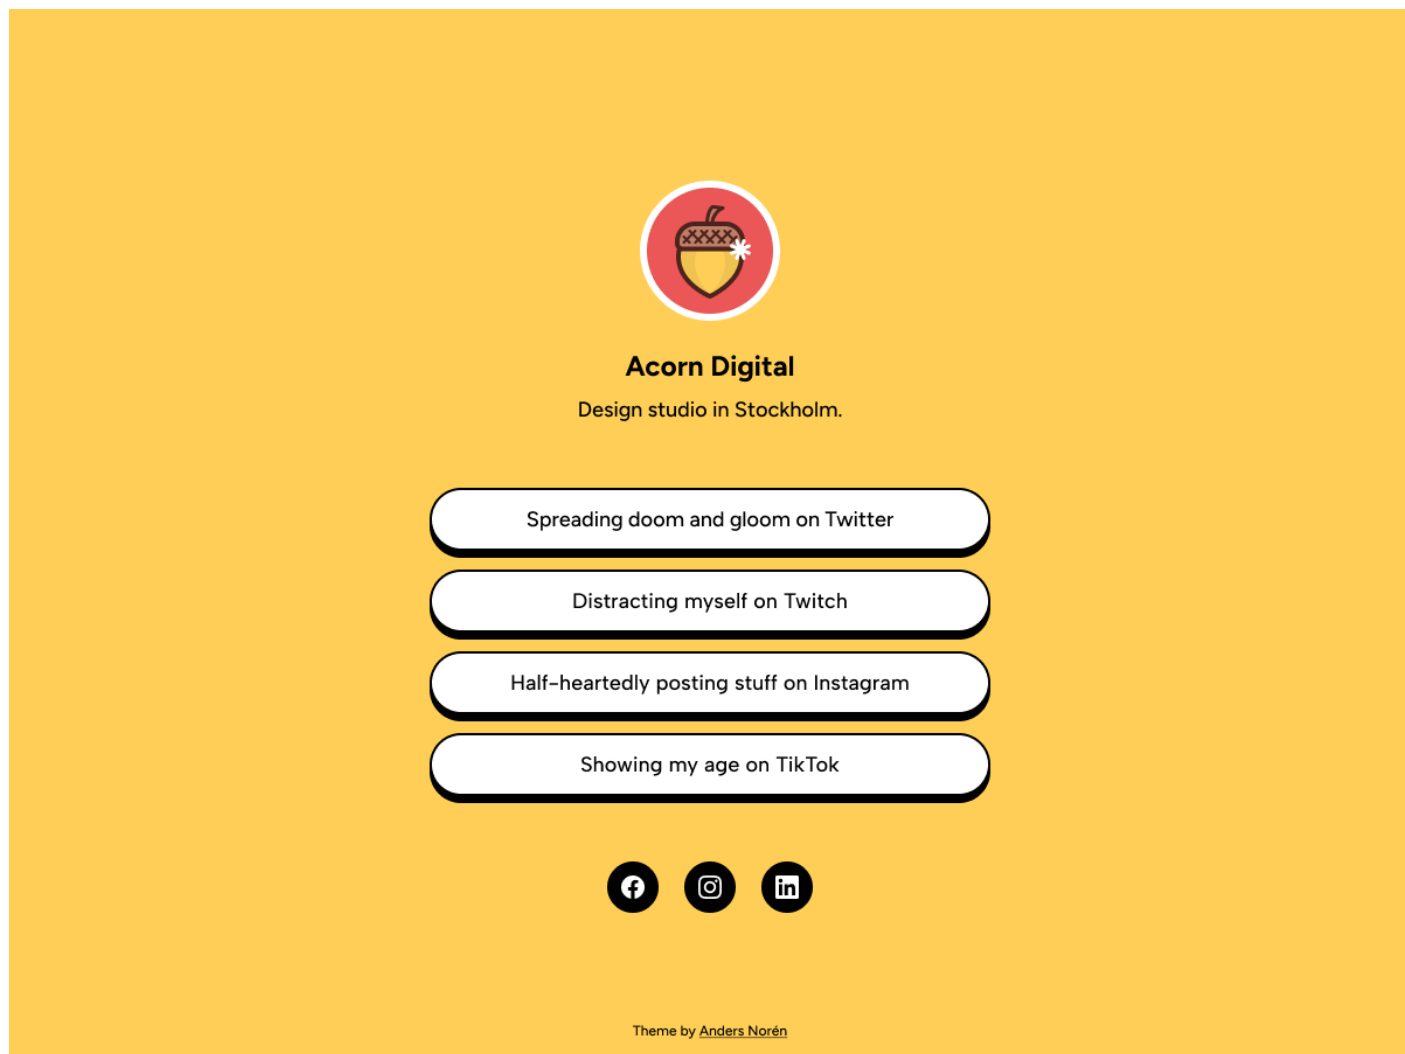

“ Note: We have received some reports of silent crashing starting with 2.7.9. This is immediately fixed by reinstalling the [MSVC Redistributable](#).

2024-12-27 cara mengganti atau menukar fungsi tombol keyboard di windows 10 dan 11

jadi setelah lihat salah satu [postingan](#) di lobste.rs (tepatnya komentar yg [ini](#)) akhirnya kepikiran dan keinget kalau dulu pernah juga mengganti fungsi tombol capslock dikeyboard dengan tombol ctrl, lalu cari tahu caranya untuk di windows 11, ketemu beberapa cara dan yang paling simpel menurut saya yakni menggunakan fitur [Keyboard Manager](#) diaplikasi [PowerToys](#) seperti screenshot diatas.

2024-12-30 cara menampilkan semua komentar/reply di reddit

comment options

sort comments by **best (recommended)** ▼

☐ ignore suggested sorts (suggested sorts may be set by community moderators for specific threads or subreddits, like Q&As)

☐ show a dagger (†) on comments voted controversial (a controversial comment is one that's been both upvoted and downvoted significantly)

don't show me comments with a score less than (leave blank to show all comments)

display comments by default (1 - 500); the smaller the number, the faster your comments pages will load

ubah dipengaturan/preferensi

“ You can load up to 500 comments (1500 with Reddit Gold), at which point you'd need to manually expand things further. Note that this doesn't expand comments that are too deep (IE, too many replies down); you need to load a new page for each of those.
